DETAILED ACTION

1. This action in responsive to the communication filed on April 11, 2007. Claims 1-79 and 81-97 are pending. Claims 26-70 and 91-93 are withdrawn by the applicant. The Office would like to notify the Applicant that there has been a change in Examiner to conduct the future examination and prosecution processes of the currently pending application. The present examiner has thoroughly reviewed and searched the present invention. At this time, claims 1-25, 71-79, 81-90, 94-97 are being restricted.

Election/Restrictions

- 2. This application contains claims directed to the following patentably distinct species:
 - a. Species 1: Fig. 8 associates with Claims 1-25, 81-90.
 - b. Species 2: Fig. 17 associates with Claims 71-79.
 - c. Species 3: Fig. 19 associates with Claims 94-97.
- 3. The Species are independent or distinct because each of the various disclosed species details specific characteristic of the following:
- a. A PKI certificate architecture for a network connected to gaming system, wherein identical executable software components in different ones of the plurality of gaming machines are associated with identical identifiers and are signed with identical PKI certificates, such that non-identical executable software component in different ones of the plurality of gaming machines are associated with separate and different identifiers and are signed with separate and different PKI certificates.

Art Unit: 2135

b. A method for a network connected gaming system to prevent executable code/file of constituent computers of the gaming system.

- c. A method for a gaming machine in a network connected gaming system to generate a menu of authorized games available to players.
- 4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.
- 5. Applicant is advised that a reply to this requirement must includes an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
- 6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.411. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02 (a).
- 7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even thought the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 2135

8. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

9. Should applicant traverse on the ground that the inventions or species are not patentably distinct, Applicant should submit evidence or identify such evidence now or record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nirav Patel whose telephone number is 571-272-5936. The examiner can normally be reached on 8 am - 4:30 pm (M-F).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on 571-272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2135

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
